

K-LOVE is important to my community and I because it provides a way for Christians to spread the Word of God to friends, family members, and strangers through positive and encouraging message. Many people in our community are bombarded with negative messages and advertising from media everyday. K-LOVE is one of the few media options that I look forward to listening to everyday. Our community is already filled with bad things without the help of negative media influences. The saying "Whatever goes in comes out" is true. Whatever we fill our minds and hearts with will eventually be evident in our actions. If K-LOVE is taken off the air, I think that many people will become negative influence on others. If we leave it on, however, there is always a chance that people will listen to it and become better citizens in our community. Our community will be better off as a whole because of the positive influence of K-LOVE radio. Please don't take it off the air.
